

The Reality

There are 22.8 million children aged 5 to 16 who are out of school in Pakistan, the 2nd highest such figure in the world. These children remain trapped in a cycle of poverty and exploitation.

Our Mission

To solve this problem, Developments in Literacy (DIL) educates underserved children, especially young girls, in affordable, student-centered schools across Pakistan, empowering them to live their dreams. DIL also provides professional development to teachers and principals, improving the quality of education nationwide.

What We Do

Deliver Quality Education

DIL educates children in 191 schools, 56% of which are government schools, by:

- using technology to improve clear understanding and application of new concepts
- undertaking continuous assessment of student learning to generate successful outcomes
- **preparing students for future academic pursuits** through programs that offer life skill training, scholarships, and mentorship.

Develop Educators

DIL's TEaM (Teacher Education and Management) College furnishes continuous education to DIL and non-DIL school faculty and staff through a synthesis of:

- subject courses
- pedagogical training
- management training
- ongoing assessment of teachers.

Numbers At A Glance

191 Campuses

61,448 Students
Enrolled

higher education

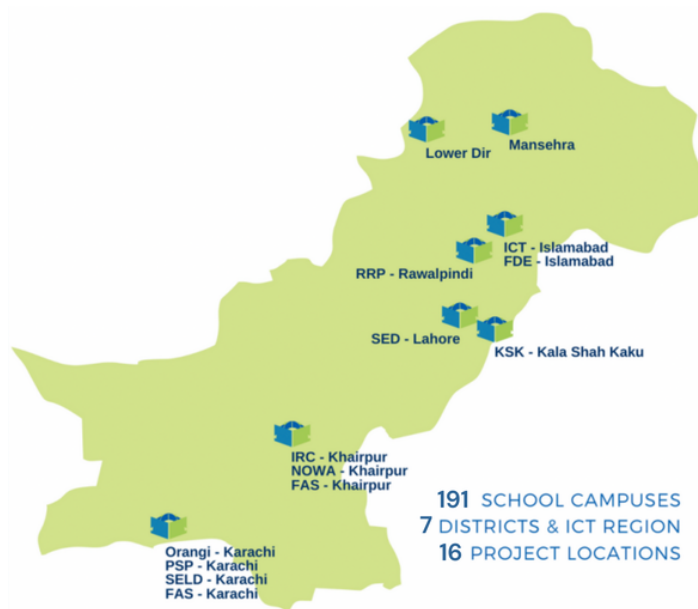

89% Student Access
to Technology

On The Horizon

- DIL will offer **130 scholarships** to students seeking a university education
- DIL will continue to raise education quality at adopted government schools.

Our Footprint

Innovate For Impact

We bring the latest EdTech to both DIL and non-DIL schools through:

- our signature **Technology Enabled Academic Learning (TEAL)** program that fortifies core subject instruction through video lessons, enabling students to become independent learners
- our e-libraries and reading programs, which significantly improve English reading comprehension and oral fluency.

Tailor Curricula

DIL enhances the national curriculum and fosters better learning by:

- creating tailored lesson plans and guides
- localizing our curricular materials to make the content more relatable and easier to grasp
- encouraging students to think creatively, reflect critically, and work collaboratively.
